

Tableaux

The Elegance of Faux Iron

Elegance

Combining historical inspiration with modern technology, Tableaux™ provides the look and feel of wrought iron beautifully interpreted in Tuscan swirls, Moorish stars, Fleur de Lis, and geometric patterns.

At affordable prices and a fraction of the weight, Tableaux can easily be installed in spaces where costly wrought iron would not only break the budget, but would be structurally impossible.

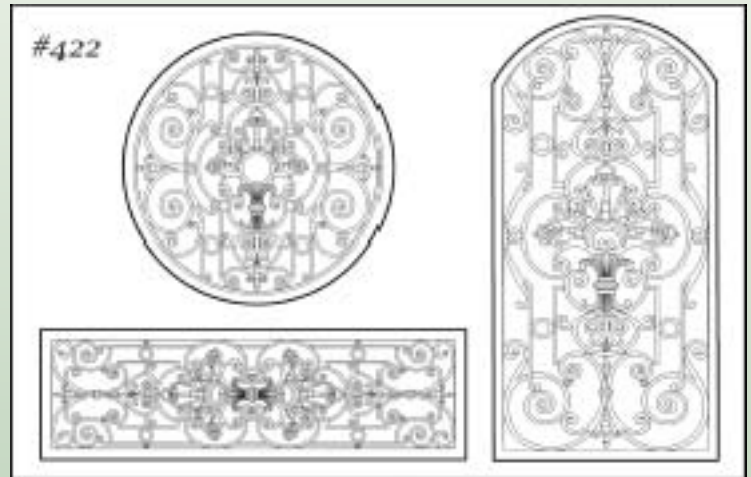

Unlimited designs, and a variety of finishes are customized to fit any size or shape project from window treatments to decorative accessories – the possibilities are endless.

Any Pattern, Any Shape, Any Size

Your design is configured to fit countless applications. Tableaux offers perfect solutions for:

- Transoms
- Arches
- Cornices
- Sidelights
- Niches
- Shutters
- Ceilings
- Door or Cabinet Inserts
- Skylights
- A/C Grilles
- Interior Gates
- Wall Decorations
